**Becker Pumps Introduces the New Loaner Pump Program**

Cuyahoga Falls, OH (May 2017) – Becker Pumps Corporation announces the launch of their new Loaner Pump Program.

The new program allows manufacturers to keep production running while their pump is being repaired or rebuilt. The new program is part of Becker's commitment to *Best in Class* customer support. The Loaner Pump Program ensures minimal downtime as the customer uses the loaner pump while the original unit is being repaired. The repair may be done at the customer's facility or at Becker's repair center. Customers are also encouraged to inquire about Becker's Field Service by contacting technical support at [service@beckerpumps.com](mailto:service@beckerpumps.com) or their Area Sales Manager, who can be located on the Becker website at [beckerpumps.com/dealer-locator/](http://beckerpumps.com/dealer-locator/).

Becker's full range of dry/oil-less pumps, oil-flooded pumps, regenerative blowers, and combined pumps are available for loan including:

**Oil-less Vacuum Pumps**

- VT Series
- KVT Series
- VTLF Series

**Oil-Flooded Vacuum Pumps**

- U Series
- O Series

**Regenerative Vacuum and Pressure Blowers**

- SV Series

**Oil-less Pressure Pumps**

- DT Series
- KDT Series
- DTLF Series

**Combined Vacuum/Pressure Pumps**

- DVT Series
- T Series

Becker has seen considerable growth in their aftermarket parts sales and pump repair service. In April, 2017, Becker doubled their staff to support parts sales and technical service.

Becker's repair center is located at their headquarters in Cuyahoga Falls, Ohio. The repair center features factory trained repair technicians dedicated to service the full line of Becker pumps, systems, blowers and compressors. Repairs are made using only genuine, original manufacturer's replacement parts ensuring the longevity and performance of the pump.

###

## Backgrounder

Becker manufactures a complete line of oil-flooded and oil-free rotary vane, regenerative blowers, rotary screw vacuum pumps, and low-pressure compressors. These pumps are incorporated into complete central systems and variable frequency drive units to offer an economical and environmentally friendly alternative to standard models. Becker has an internationally networked development team to work with customers on providing equipment manufacturers with the appropriate pump for their application. Manufactured to the highest quality standards in Germany, Becker has brought *Best in Class* engineering to the global marketplace for over 130 years.

Becker pumps can be found on virtually every type of manufacturing and material handling equipment that requires vacuum or pressure. Becker pumps are also predominantly used in many different industries which include food packaging, printing, woodworking, paper converting, cosmetic, pharmaceutical, beverage, dairy, chemical, medical device and consumer packaging.
