

Best in Class

**FIRST WITH
IE3 COMPLIANCE**

First with
IE3 Compliance
 All Becker Pumps Meet the
 New Global Premium Efficiency
 Motor Compliance

The First Vacuum Pump Manufacturer to be IE3 Compliant!

Becker Pumps Corp. proudly announces we are the first manufacturer of vacuum pumps and low pressure compressors in the USA to supply the new IE3 standard motors **across our complete line of both vacuum and pressure pumps.**

- **IE3 compliance includes ALL models of Becker pumps** as well as all voltages which are required by law. (1 HP/75 kW or larger).
- **IE3 compliance on all pump models allows Becker** to be ready to ship from its large inventory of vacuum pumps and compressors.
- **IE3 compliance on all product** is a claim most other vacuum pump suppliers cannot make.

Why should you demand your OEM supply IE3 motors?

- So you are assured of future pump deliveries!
- So you save on electricity costs!
- So their motor issues don't become your motor issues!

If your OEM is not providing IE3 motors:

- They are non-compliant with the US mandate to supply anything other than Premium Efficiency IE3 motors.
- They cannot sell or ship product supplied with other motors.
- They are not meeting the best interests of your business.

Becker is the first to assure you that we are IE3 compliant across our complete line and will deliver your pumps with Premium Efficiency IE3 motors.

Take a look at the entire line of Becker pumps, all of which are IE3 compliant, at our website.
