

Best in Class

**EXTREME DUTY VACUUM FILTER
SPINMEISTER™ ST SERIES**

IN-LINE, CLEAR COVER FILTERS

In these extreme duty vacuum filters, centrifugal force from intake air causes particulates to separate from air stream, forcing it to the outer cover perimeter and then out through the discharge port. The SpinMeister™ Precleaner eliminates large objects from entering air stream and then air stream then enters the inlet filter and is filtered by a highly successful 99+% efficient pleated element.

Technical Specifications

- Vacuum Rating: Coarse vacuum service
- Temp (continuous): min -15°F (-26°C) max 220°F (104°C)
- Filter change out differential: 15-20" H₂O over initial Δ P
- Polyester: 99%+ removal efficiency standard to 5 micron
- Paper: 99%+ removal efficiency standard to 2 micron

Features

- Extreme duty filtration for high dust environments
- Excellent removal for short fibers
- Significantly increases life of filter element
- SpinMeister™ Precleaner 85+% efficient up to 15 microns
- Durable molded fiber filled composite material
- Pressure drop reduced compared to typical precleaners
- Bucket made from shatter resistant polycarbonate
- Large dirt holding capacity
- Clip release band for easy maintenance

Options

- SpinMeisters™ available in polished Aluminum
- Larger systems available
- Various media
- Spool piece extender (select models)
- Pressure drop gauge
- Carbon steel bucket versions
